

## **SHREWTON MILITARY LIAISON REPORT - 4 OCTOBER 2017**

### **MOD Traffic**

There were many more reports of MOD traffic into the Village. We need to be clear that, at this stage, military drivers are permitted in our village just not the vehicles that contravene the weight restrictions. We are gaining some additional road signage funded and produced by the Defence Infrastructure Organization relating to military vehicles and Shrewton Village.

### **Army Basing Programme**

'Inside the wire', the arrival of the first single living accommodation (SLA) 'Modular Units' (bedrooms) took place at Larkhill Garrison in November 2016. Just ten months later, the new build 378 bed space junior ranks SLA village has been completed, handed over and is now being occupied.

Larkhill works to the end of 2017 are as follows:

- New SLA (1362 total bed spaces)
- New Armoury
- New Regimental HQ & Battery Offices
- New Garages
- New Stores
- Utility Works
- Various car parks
- Various demolitions

Enabling works, earthworks and ground improvements will take place. Agreed traffic routes and AA signage are in place to manage deliveries to garrison sites. To avoid adding to congestion at the main Larkhill Garrison entrance, a dedicated gate for construction traffic has been created.

A gas main has been found that the contractors were unaware of and never before mapped. I do not know the impact of this on the works. Otherwise one way working is due on The Packway as soon as the roundabout is finished, whilst cycleway and pavements are sorted out this will continue as will the Sewer Main going down Larkhill Road Durrington with one-way working until December 2017.
