

Flood Wardens Report September 2018

I am now preparing for the onset of Autumn and Winter, I have ordered 100 Gel sacs which come at nil cost, these will be stored either in the round house or at a local farm they are light to handle and compact compared with sand bags making them far more user friendly.

I attended the area Flood Wardens Working Gp held at Bulford where I made the final arrangements to meet the Environment Agency at Rolleston road to show them the A360 drain into the Till. I also obtained permissions from the Landowner and the Land user to access the field that drain is piped through.

Since the meeting the EA and myself have cleared the reed beds, nettles and brambles from the area of the pipe and have found the outlet to the river. Unfortunately, the EA cannot excavate the bank so I have asked Dave Warne who was going to do the job last December if he could do it and he has agreed to do it in the next week or so.

That concludes my report. Den Parrett
