

Traffic group report for October 2019

London Road traffic volumes

From 4 August to 3 September 129,818 vehicles transited the London Road. The average speed was 29.9 MPH, with an 85th percentile speed of 35.4 MPH i.e. 15% of vehicles (19,473) were exceeding 35.4 MPH. The maximum speed recorded was 72 MPH.

Additional SID mountings

I am pleased to be able to report that the additional SID mountings were delivered on Monday 30 September. It is hoped that the 'mobile' SID will soon be deployed on other roads around the village.

As advised on the Parish Council meeting agenda, the CATG meeting planned for Monday 14 October has been postponed until the following Friday, 18 October.

This concludes the traffic group report.
